

## **SCOOTER COMPUTER LAUNCH NEW 'AT HOME' SERVICE**

**WHO** - The recently launched **Scooter Computer** boasts an experienced team of both highly-qualified and experienced staff who are equipped to fix your computer and solve any other home technology issues. These friendly professionals are both sympathetic and patient, and are happy to pass on useful tidbits of knowledge which may well prevent future call-outs. These knights of the IT world will rescue even the most distressed of technophobes and fix any problem (within reason) in the comfort of your own home.

**WHAT** - Scooter Computer is fully equipped to cover both PCs and Macs, but the service doesn't end there..... Qualified technicians are also on hand to fix other technical equipment which might be causing unnecessary headaches. For example, troubleshooting can be provided for both iPods and digital cameras. Whether lying redundant and gathering dust due to malfunctioning or an intimidating instruction booklet, Scooter Computer is keen to get even the most reluctant technophobe on the road to recovery. Further services include computer MOTs, internet parental controls, virus protection, lessons, web design, data backup and much more.

**WHY** - This service has been designed to help those who are either dissatisfied with existing technical support, do not have access to immediate support, or would rather experience the ease of having their computer fixed in their own home. It has been set up to help individuals maintain a trouble free IT experience, and to prevent people from wasting both time and money.

**WHEN** - The Scooter Computer team is on-call seven days a week. Their promise is to provide a polite, patient & punctual service. As the team operates mainly on scooters they are able to travel quickly between jobs.

**WHERE** - Operating out of a west London office, the service currently covers addresses within central London and all SW postcodes

**HOW MUCH** - Prices from £49 for the first hour and £25 per half hour thereafter. There is no call-out charge and a 'no fix no fee' policy.

- Ends -

***Available upon request - Scooter Computer Logo, Photo of technician entering house, Photo of technician at work***
